

**ROLE OF TITANIUM DOPING IN
UV SENSING STUDY OF
COPPER OXIDE
 $\text{CuO} [\text{Cu}_{1-x}\text{Ti}_x\text{O}]$**

Submitted By

ASHMITA PANDA

Under the Guidance of

DR. SOMADITYA SEN

Associate Professor

Physics Metallurgical Engineering And Material Sciences

Indian Institute of Technology Indore

PhD Scholar

PRASHANT KUMAR MISHRA

Research Scholar (JRF)

Department of Physics

Smart Lab Group

Indian Institute of Technology Indore

ACKNOWLEDGEMENT

I would like to express my deep and sincere gratitude to my guide **DR. SOMADITYA SEN**. It is an honour for me work on a project under his guidance. I hereby take the opportunity to thank **Mr. Prashant Kumar Mishra (PhD Scholar)** for his extensive help and for providing valuable information regarding my work. I would like to express by sincere gratitude to **all lab members** for their help and support.

Contents

1. Introduction	3
1 Literature Survey	3
2 Experimental	3
3.1 Sol Gel Method	3
2.1 Synthesis	3
2.2 Calculation	3
3 Characterisation Techniques	3
3.1 X-Ray Diffraction	3
3.2 UV-Sensing	3
3.3 IV-Sensing	3
3.4 Raman Spectroscopy	3
3.5 UV-vis	3
4 Results and Discussion	3
4.1 X-Ray Diffraction	3
4.2 UV-Sensing	3
4.3 IV-Sensing	3
4.4 Raman Spectroscopy	3
4.5 UV-vis	3

Introduction

1 Literature Survey

2 Experimental

1. Sol Gel Method

2.1 Synthesis

2.2 Calculation

3 Characterisation Techniques

3.1 X-Ray Diffraction

3.2 UV-Sensing

3.3 IV-Sensing

3.4 Raman Spectroscopy

3.5 UV-vis

4 Results and Discussion

4.1 X-Ray Diffraction

4.2 UV-Sensing

4.3 IV-Sensing

4.4 Raman Spectroscopy

4.5 UV-vis
